

Alberta Miners Will Strike on April 1

1922 ESTIMATES PROVIDE FOR RAILWAY LOSS

\$42,800,000 Will Be Provided for the Canadian National Lines

MERCHANT MARINE LOAN

Vote for Experimental Farm to Be Increased—\$33,000,000 for Pensions

OTTAWA, March 24.—(By Canadian Press).—Provision made in the estimates for the coming year for the Canadian National railway and the Merchant Marine loan, included votes for experimental farms, increase in the pension fund, and other items.

The railway estimates include an amount of \$42,800,000 to meet such expenditures by or on behalf of the Canadian National railway and the Merchant Marine loan, included votes for experimental farms, increase in the pension fund, and other items.

WASHINGTON, March 24.—There is no likelihood of a suspension of operations in both the bituminous and anthracite coal fields on April 1 can be prevented, it was said today at the White House. The government was declared to have "exhausted its resources in the way of suggesting a conference" between operators and miners that might forestall the strike.

Though the situation will be scrutinized as it develops, the government has no plan for taking action before April 1, it was added. The strike will be done after April 1 will be determined by the effects of the strike itself.

CALGARY, March 24.—A cessation of work in all mines in District No. 18 of the U.M.W.A., comprising Alberta and eastern British Columbia, will take place on April 1, according to a statement made to the Canadian Press by Robert Livett, international board member, after receiving a letter from the Western Canada Coal Operators' association Friday night. As a result of their special meeting today, the operators notified the miners of labor that they had selected W. W. McNeill, of the Workmen's Compensation Board to act as their representative on the board of conciliation, also that they refuse absolutely to pay the present scale of wages, but will pay rates now posted at their mines to come into effect on April 1, pending an announcement of the board's finding.

SEATTLE, March 24.—(By Canadian Press).—The estimates for the coming year also contain an item of \$14,500,000 to be provided for the Canadian National railway and the Merchant Marine loan, included votes for experimental farms, increase in the pension fund, and other items.

The railway estimates include an amount of \$42,800,000 to meet such expenditures by or on behalf of the Canadian National railway and the Merchant Marine loan, included votes for experimental farms, increase in the pension fund, and other items.

Main Estimates for Financial Year Presented to Parliament By the Minister of Finance

	1922-23	1921-22
Interest and chief expenditures resulting from the war	1,222,470.42	1,141,133.42
Pensions	31,671,000.00	31,582,858.88
Postoffice and telegraph	10,181,143.45	10,181,143.45
Postoffice civil re-establishment	15,468,500.00	15,468,500.00
Total	58,543,113.87	58,373,636.75
Railways (not including capital)	18,210,720.00	18,210,720.00
Household loans (revenue)	1,000,000.00	1,000,000.00
Total	77,753,833.87	77,584,356.75
Leaving for government purposes	1,116,644.00	1,116,644.00
Capital (including war capital)	1,116,644.00	1,116,644.00
Adjustment of war claims	8,411,800.00	8,411,800.00
Grand total	89,982,221.87	89,982,221.87

Alberta House Asks Reduction Freight Rates

ALBERTA HOUSE ASKS REDUCTION FREIGHT RATES

Need Is Emphasized with Special Regard to Farm and Mine Products

HELP PRODUCTION

The Attorney-General Feels That Western Canada Needs Dramatic Cure

Without driving and in full accord with the spirit of the motion the legislature Friday afternoon endorsed a resolution calling for an immediate reduction in freight rates on basic commodities, particularly products of the farm and mine, so that production should be encouraged in the west and the distribution as between eastern and western rates brought to an end.

The motion was proposed by Hon. J. R. Brown, attorney-general, the only other speaker being Hon. C. R. Mitchell, hon. member for Calgary. The Alberta House has already indicated its attitude on the question of freight rates before the legislature and the motion was passed by a large majority.

SEATTLE, March 24.—(By Canadian Press).—The estimates for the coming year also contain an item of \$14,500,000 to be provided for the Canadian National railway and the Merchant Marine loan, included votes for experimental farms, increase in the pension fund, and other items.

Joint Municipal and Provincial Ownership for Hospital at Strathcona Is Urged in Bill

Management May Be Made up of Nine Members—Measure Was Given First Second Readings with Unanimous Consent of Legislature—Better Clinical Facilities Are Needed

The establishment of the Strathcona hospital on the university grounds at Edmonton is a project which has been discussed for some time, but which has not yet been carried into effect. A bill introduced in the legislature today, which would provide for the joint ownership of the hospital by the city and the province, was given its first and second readings with unanimous consent of the legislature.

Alberta's Proposed Taxation Plan Assailed in Legislature Friday; Charges Imposible Says Premier

Greenfield Declares Government Has Considered Its New Measures Carefully and They Must Be Made Law—All Bills Passed Save Gasoline Levy, Which Will Be Presented Today

Members of the opposition side of the house Friday night in a debate vigorously assailed the new taxation measure of the government, proposing increases under the corporation tax, the automobile tax, the mine owners tax and a charge on the second real estate of the province. After Hon. J. E. Brownie had introduced the second reading of the corporation tax bill, the discussion moved to the gasoline tax, which is the taxation measure on the order of the day. Premier Greenfield, who is a severe critic of the gasoline tax, which he proposed was "class taxes" being imposed at the expense of the people in the urban centres already taxed practically all.

Opposition Leader Harrowed
The debate had been going on in order that the leader of the opposition might be harrowed, and the speaker of the evening session Hon. Mr. Mitchell attacked the government's plan. Mr. Mitchell said that the nine-month bill of Hon. Mr. Brownie was a "class tax" and that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Government Defends
Members on the government side of the house defended the taxation measure and even got into an argument with the opposition. Mr. Mitchell said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Explaining the Corporation Tax
Mr. Brownie explained the corporation tax measure and said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Explaining the Gasoline Tax
Mr. Brownie explained the gasoline tax measure and said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Explaining the Automobile Tax
Mr. Brownie explained the automobile tax measure and said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Explaining the Second Real Estate Tax
Mr. Brownie explained the second real estate tax measure and said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Explaining the Corporation Tax
Mr. Brownie explained the corporation tax measure and said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

Explaining the Gasoline Tax
Mr. Brownie explained the gasoline tax measure and said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

WORLD REVALUE STOCK NOW HELD FOR SECURITY

Resolution on the Subject Was Adopted by the Alberta Legislature

AMENDMENT WAS LOST

Capt. Bowen Would Show Province Share Loss and Show Sincerity

After dividing twice on counter proposals, including a motion to adjourn the debate, the legislature Friday night passed a resolution introduced by Capt. Bowen, which would show the province share loss and show sincerity. The resolution was adopted by a vote of 18 to 12.

Advised Mrs. Mitchell
Hon. Mr. Mitchell was advised that the resolution was adopted. He said that the government was trying to get the people to pay for the cost of the war. He said that the government was trying to get the people to pay for the cost of the war.

FIREPROOF TANK IS SOUGHT FOR GREAT BRITAIN

Twenty Seven Firms Submit Designs of "Safe" Gasoline Container

Edmonton, Alberta, Aug. 10.—(By wire.)—The British government is now in progress of a search for a fireproof gasoline tank for use in the event of a plane crash. The tank is to be of a type which will not explode in the event of a crash.

Aircraft experts state that twenty seven firms have submitted designs for a tank which will not explode in the event of a crash. The tank is to be of a type which will not explode in the event of a crash.

Through the use of the tank, the British government has now offered prizes to private companies, which are to be awarded to the firm which designs the best tank. The prize is to be of a type which will not explode in the event of a crash.

The British government has now offered prizes to private companies, which are to be awarded to the firm which designs the best tank. The prize is to be of a type which will not explode in the event of a crash.

Actual crash conditions are simulated in the tests. The gasoline tank is mounted on a wooden chassis, together with a heavy concrete base, as it would be in the event of a crash. The tank is then subjected to the test of a large, dirigible and is placed on an inclined plane, which is tilted to the extent of a sharp angle.

When the tank is placed on the inclined plane, the gasoline tank is placed on the inclined plane, which is tilted to the extent of a sharp angle. The tank is then subjected to the test of a large, dirigible and is placed on an inclined plane, which is tilted to the extent of a sharp angle.

Piston Rings Play Important Role In Life of Car

Motor car owners are wise when it comes to suggestions and information pertaining to their cars. They need, widely in the automobile sections of newspapers and magazines and should be interested in the latest developments.

One of the most important parts of an automobile, which, because it is so vital, is often overlooked, is the piston rings. These are the parts which are in contact with the cylinder walls and are responsible for the compression of the gas.

When you are using the ordinary type of piston ring, the oil which is on the cylinder walls is scraped off and is thrown into the crankcase. This is the normal operation of the piston rings.

HENRY FORD DECLARES WAR ON AUTO WORLD

Detroit Auto Generalists Prepare to Buy Two More Companies

(From Wall Street Journal.) Henry Ford soon may be the whole automobile industry, instead of just the dominating figure, as he now is. It is reported he plans to buy two more well-known motor companies.

One of them among the three most successful in the country. These acquisitions would completely round out the Ford line with four kinds of cars at four different prices. Such formidable competition would make the "Ford" motor companies to assemble fearfully for what business might be left over.

That of a "war" to be declared against the other car makers. Ford appears to be singularly ill-equipped. In fact, just the reverse is indicated by recent developments. Ford's acquisition of the Lincoln Motor Company in the high priced car market. Lincoln's production of cars is about 10,000 a year. Ford's production of cars is about 10,000 a year.

Lincoln's production of cars is about 10,000 a year. Ford's production of cars is about 10,000 a year. Lincoln's production of cars is about 10,000 a year. Ford's production of cars is about 10,000 a year.

Motor Trucks Release Freight Car on Railway

The railroads entering Cincinnati have recently worked out a plan of exchanging freight by means of motor trucks. These trucks have been used in the way of releasing cars for train service. The plan is to use the motor trucks to carry the freight from the railroads to the city and vice versa.

CHANGE URGED IN WIRING OF AUTOMOBILES

Accessibility and Standard Coloring Suggested by Automotive Engineers

Another step to make things easier for the motorist will be taken if the Society of Automotive Engineers is followed. That concerns improvements in the automobile wiring system.

First among the plans to improve the wiring system is that of making the instruments on the dash more accessible. That can be done, it is suggested, by lengthening the wires leading to these instruments so that the instruments can be moved to allow easy access to the wiring.

Secondly, longer wires on the switch, ammeter, fuse block, and other electrical instruments on the dash, would make a large saving of time and effort for the mechanic. As it is now, the mechanic has trouble getting to the instruments on the dash.

Another improvement is that of having a specific color for each circuit. So that every make of car has a circuit which can be identified readily. This would be standardized by the S.A.E., so that all automobiles would follow the same system of coloring.

As a result, there would be little need for wiring diagrams. If a mechanic knew that all cars had a specific color for each circuit, he would be able to find the circuit without the aid of a diagram.

Some makers are using colored insulation on the wires for the various circuits but no attempt has yet been made to standardize the colors for all cars.

Polishing unpainted parts. An excellent compound for polishing the unpainted steel parts of a car may be made by mixing soap and emery powder into a paste. This will remove any rust that may have formed, and will leave the metal smooth without scratching it.

Tips for Auto Owners Who Do Own Tinkering

As a rule, owners of electric vehicles have had experience with the care of the storage battery, but there are a few things which are of particular importance to those who have not had such experience. One of them is to be sure to bring it up to the proper voltage before it is used.

Another tip is to be sure to bring it up to the proper voltage before it is used. Another tip is to be sure to bring it up to the proper voltage before it is used. Another tip is to be sure to bring it up to the proper voltage before it is used.

ALBERTA POTATO GROWERS MUST STANDARDIZE PRODUCT TO COMMAND BEST MARKETS

Producers Should Set Standard that is Above that Required by the Grading Regulations—Product of Definite Standard Of Pack and Quality Brings Premium on the Market.—Trade Name Important

(By W. H. Broadbent)

In creating a demand and establishing markets for any commodity it is absolutely necessary to standardize both the pack and quality of that commodity. In marketing potatoes we must, if we expect to be successful, grade and pack our product so that it will be pleasing to the sight and taste of the consumer. In grading we should always bear in mind that the grading regulations are only for a guide, and it would be much better if we set a standard of our own above the grading rules, rather than attempt to keep just within the regulations. The Housewife Rules for potatoes of a smooth medium skin that can be peeled with a minimum of waste, many consumers will willingly pay a premium for such.

Recent potatoes are held at a discount in nearly all markets owing to the fact that in the past growers have taken little or no pains to grade properly, to overcome this handicap we must set a standard and adhere to it. It is well known that we are able to turn a reputation for our product that will stand up in competition with potatoes from other producing centres.

We all know what "Bunker" has done for the orange growers in California, and "O.K." for the apple growers in the Okanagan Valley of British Columbia. We know that "Bunker" stamped on a box of apples the word "O.K." on a box of apples means a definite standard of quality. Retailers and wholesalers demand products of these brands and look for them, which facilitates marketing for these organizations and offers them a premium over other stock on the open market.

We can create such a demand for our product if we will set a standard and high enough, and live up to it, to convince the ultimate consumer that our potatoes are well worth buying.

Since all attention for market return comes from a dealer to influence the market price, it is appropriate that we have a discussion of marketing by outlet instead of certain factors which always affect farm products. These factors are independent of the market price and will not be eliminated, though they may be modified. Some of the fundamental facts, it is not safe to claim for any market system that it will always operate equitably and profitably for all concerned; nor should we condemn as a failure a new marketing venture when it fails to arrive, or change, the influence of these factors.

The variable supply of the product and the demand for the same are always important factors. The law of supply and demand affects the price of all farm products from year to year. The price of potatoes is in-

fluenced by the law because of the perishability of the product and over-production of potatoes depresses the price during the marketing season, while a considerable shortage raises the price because consumers increase their bids in order to obtain a scarce article.

The distribution of shipments during the marketing season is another strong factor in setting the price received by the grower. This influences consumers to move potatoes into the market, rather than wait for the inferior stock, and a effort to increase the price received can be successful if it does not include a plan for improvement, or at least maintenance of the quality.

Three factors must be taken into consideration when we plan to increase costs and increase profits by a reform of our marketing system. In marketing a supply of the potato marketing system it is well for one to get a proper understanding of the route followed this route the more growing is to the west, the more it is to be taken up by a sweeping proposition to "Out into the middleman."

Persons have through a number of agencies and receive a definite advantage from each on their way from the field to the table. They may be planted and harvested by the grower. The grower sells to a buyer who collects cartons and sells or consignment to dealers in some large central market. From the dealers or retailers the potatoes are bought by jobbers who buy cartons and sell to the retailer who buys in small quantities and sells to the consumer.

It is obvious that in most cases all the expense named must be paid by someone. To eliminate the expense simply to require someone to perform two services—which cannot be depended upon to reduce the price for service may be paid to the consumer.

The retailer, who, often recommended for too expensive market machinery are direct marketing and co-operative marketing.

Direct marketing of potatoes means

the direct sale by the grower to the consumer and is profitable only when they live within wagon haul of one another, or when, living far apart, they both handle cartons of one another. Co-operating in marketing is frequently recommended as a means of "eliminating the middleman" with the association. The saving depends upon the efficiency and economy of the association's management.

It cannot be the entire amount of the dealer's fees for the expense of time of operation, of labor and of investment must be indicated in one case as in the other.

The efficiency of co-operative organizations has been exaggerated by many enthusiasts. It is a fact that it is too lightly undertaken. This form of doing business is not one of the most difficult and its demands are such as fall rather heavily upon the time and attention to the growing and harvesting of the crops.

A number of co-operative marketing associations the grower must take on additional duties and responsibilities. Meetings must be attended, markets explored, the product graded and packed according to the regulations approved by the association. The grower can no longer cling to his pet notions and prejudices regarding matters which concern the organization as a whole, for first of all, a co-operative association must have unity and agreement among its members.

Co-operatives must be willing to bend to the will of the majority and continue loyal to their organization. It is important that any co-operative organization have an efficient business manager, for an association formed under the most favorable conditions must be ineffective unless the management is efficient. Such managers must possess qualifications that are unusual and somewhat hard to find. It is not enough that he be a good accountant, or that he be honest and fair, he must know the product he handles, know the men, and how to meet them, and know the market. It is logical to assume that a man so equipped must receive a remuneration at least commensurate with what he would realize if he were in business for himself. It is foolish policy to employ a cheap manager, and an agent cannot be gotten for the thing.

For although he is the paid agent of fifty or more growers, the business must be conducted as though it belonged to one man. There must be quick decisions, prompt attention to the business, and a desire to see advantage which cannot be gotten if the matter must come to a vote at each important move. An association is not a democracy, it is a business, and annual and other meetings, but the manager must be trusted to carry out his purpose, without too much meddling over details.

There are several reasons why it is impossible for co-operative organizations to buy the produce of a number of growers. One is the fact that the capital required is more than the organization can safely furnish. In the case of a steadily declining market the association must continually lose.

Individual buyers, who trust to their own capital or credit to carry them through, may survive a season of losses, but very few co-operative as-

REDUCTION OF CROP ACREAGE NOT WARRANTED

Production Must Be Stabilized As Much as Possible—Careful Organization Necessary

For years the farmers have been told to reduce the acreage of potatoes to increase production, and when they had gotten the message they were told to view their potato acreage and said that the message was not theirs. They were not supposed to have been told to do so. Considering the fact that the world was very low of grain and potatoes, it was not surprising that the message was not theirs. The fact is that the message was not theirs. The fact is that the message was not theirs. The fact is that the message was not theirs.

STEADY INCREASE IN CREAM PRODUCTION; NO SURPLUS BUTTER

Cream receipts are increasing steadily, but with a good demand for all the butter made, there is not likely to be a surplus for some time and no decline in prices expected by creameries are also good butter for special export. On the 1st of 1925 the creameries of the province were producing 1,000,000 lbs. of butter per week. The increase in production is being met by an increase in demand.

During the past few weeks there has been a steady increase in the local demand for butter. According to local dealers the demand is now at its highest level. The increase in demand is being met by an increase in production.

WEEKLY REVIEW OF MUSIC IN EDMONTON

More than ordinary interest was manifested by the public to the program of recitals by local composers performed at the Women's Musical Club last Saturday. The program was a most successful one, and the enthusiastic applause throughout the afternoon was a tribute to the quality of the music. The first place in the program was given to the first of the two recitals, on which native composers have been given a hearing by the public. The first of the two recitals was given by the local composer, Mr. W. N. A. McMillan. His program was a most successful one, and the enthusiastic applause throughout the afternoon was a tribute to the quality of the music. The first place in the program was given to the first of the two recitals, on which native composers have been given a hearing by the public.

The second of the two recitals was given by the local composer, Mr. W. N. A. McMillan. His program was a most successful one, and the enthusiastic applause throughout the afternoon was a tribute to the quality of the music. The first place in the program was given to the first of the two recitals, on which native composers have been given a hearing by the public.

'STATE NORMAL' SCHOOL, PLYMOUTH, N.H.

What's under I wonder said Mary to Jack the forest 'tween April first—what—what!

AN APPEAL

on behalf of the

Starving Children in Russia

From indisputable evidence of those who have lately returned from the famine district in Russia, millions of Children are doomed to starvation unless immediate assistance is afforded.

The Canadian Government does not feel justified officially, in appropriating public monies for this relief work, unless the move is first supported by voluntary subscriptions on the part of the people of Canada.

The Canadian Committee of the Save The Children Fund has been formed for the purpose of collecting donations on behalf of some ten million children who will inevitably starve to death without this assistance.

The Government has the assurance of Lord Weardale — Chairman of the British Fund — of Dr. Nansen, International High Commissioner of Relief in Russia — and Mr. Herbert Hoover, on behalf of the United States, has also given similar assurance — that all foods sent to the famine districts are carefully guarded and reach their destination intact.

The food supplies at the disposal of the Save The Children Fund and other relief organizations in the famine area are inadequate to cope with the situation, while the need for more is immediate and pressing.

The people of Canada are asked to come to the rescue of the starving children of Russia by subscribing to the Save The Children Fund. All money contributed in Canada is expended on Canadian foodstuffs. Shipments are already on the way through this organization.

25 cents will feed a child for a week.

\$1.00 will ensure sufficient food for a month.

\$500.00 will establish another kitchen to feed 100 children until next harvest

Cheques and money orders should be forwarded through local banks or direct to Sir George Burn, Treasurer, Save The Children Fund, Elgin Building, Ottawa, Ontario.
